

COMPOST FOR LAWN

Enhances All Types of Lawns

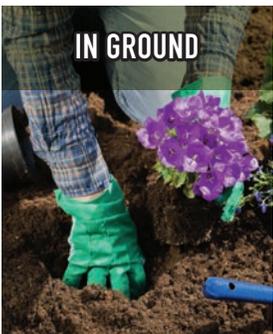

Organic Harvest's Compost For Lawns is specially formulated for all types of turf. It uses a mixture of fine organic material and sand that works its way down to the root zone. It does not contain human or animal waste, making it safe for all recreational activities.

Besides residential use, Compost For Lawns works great on golf courses, sports fields and parks.

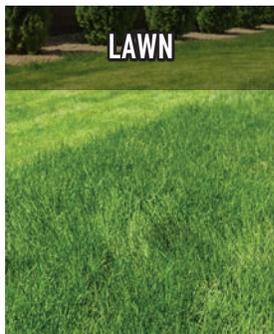

GENERAL USE INSTRUCTIONS:

Spread a consistent 1/4-inch layer evenly with a rake or spreader, then deeply water (4-6 inches) to settle the compost and activate.

For optimal results, apply Organic Harvest's Compost for Lawns in early Spring or Fall when grass is actively growing, avoiding hot or freezing weather. Mow your lawn 1-2 days before at a normal height to allow for better compost penetration. Wait 3-5 days before mowing again to let the compost establish and enjoy a healthier, more resilient lawn with reduced watering needs!
